

The Swiftsure Technical Team is looking for a volunteer to help support its Yacht Tracker, Registration, and Race Results systems. The Registration and Results systems are used for the annual Swiftsure International Yacht Race and the Tracker system is used for a number of events throughout the Pacific Northwest. You will be working remotely with the lead developer and will likely require 2-3 hours effort per week during the January – May period and occasionally be required to monitor the Tracker system during multi-day race events.

Duties

- Development and maintenance of Tracker and supporting data and input systems
- Development of WordPress plugins for Registration and Tracker functionality
- Administration and testing of Tracker events for Swiftsure and other sailing events
- Participation in planning and prioritizing annual development plans for Swiftsure systems

Code skills required:

- PHP
- MySQL
- JavaScript

Familiarization with the following is important:

- WordPress
- Node.JS
- Mercurial
- Debian Linux
- Apache

If you would like to volunteer for this interesting position please contact Dennis McMillan at technical@swiftsure.org
